INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70) 30 DEC 2004

Applicant's or agent's file reference DCR/P33696WO FOR FURTHER AC		ON See Notification Preliminary Ex	on of Transmittal of International xamination Report (Form PCT/IPEA/416)		
International application No. PCT/GB 03/04873	International filing date (da 10.11.2003	ny/month/year)	Priority date (day/month/year) 13.11.2002		
International Patent Classification (IPC) or both national classification and IPC B01J35/10					
Applicant STATOIL ASA et al.					
This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.					
2.5 This REPORT consists of a total of 4 sheets, including this cover sheet.					
This report is also accompar been amended and are the to (see Rule 70.16 and Section	pasis for this report and/c	or sheets containing	tion, claims and/or drawings which have rectifications made before this Authority r the PCT).		
These annexes consist of a total o	These annexes consist of a total of sheets.				
•					
3. This report contains indications relating to the following items: 					
II ☐ Priority III ☒ Non-establishment of o					
IV D Lack of unity of invention Neasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability, citations and explanations supporting such statement					
VI. Certain documents cite					
	VII Certain defects in the international application				
VIII ☐ Certain observations on the international application

EXAMINATION REPORT - SEPARATE SHEET

V.

1. Reference is made to the following document:

D1: EP-A-0 736 326 (SASTECH PTY LTD) 9 October 1996 (1996-10-09)

2. Novelty

D1 discloses catalysts for the Fischer-Tropsch synthesis. Although no samples are disclosed wherein all the parameters are determined for the impregnated and calcined cobalt on alumina, it seems to be inherent that starting from the Puralox SCCa 5/150 as disclosed in table 5 a catalyst is obtained which meets the criteria of the catalyst as claimed in claim 1.

Hence, examples 60 to 65 are regarded as being novelty-destroying for the subject-matter of claims 1,8-10,17-19,21-26,29,33-36,39-52.

3. Inventive step

As:D1 already indicates that the porosity of the catalyst support is important for the catalysts selectivity and/or activity and how to increase it by pretreatment of the support (see page 3, lines 13-31, figures 2 and 3) the subject-matter of dependent claims with higher values of pore volumes and pore sizes as may be found in the examples 60-65 are not inventive over D1. For this reason the subject-matter of dependent claims 2-7, 11-16,20, 27-28, 30-32, 37-38 and 53-57 does not seem to contain one or more features that could form the basis for an inventive step.
